

Extreme Crossover Pads provide protection for electrical cables used in mining and construction. Durable urethane construction withstands hundreds of thousands of pounds of weight and endures constant pounding, impact and abrasion caused by haul trucks and falling rocks. Extensively tested and proven to be oil, chemical, abrasion, cut/tear and temperature resistant.

Type 1 & 2: Feature molded-in hand holds for ease of placement.

Type 3 & 4: Feature two molded-through holes (1 inch) for fastening together multiple pad sections using wire rope (wire rope not included). Crossover sections can be connected together for any length required. Crossover pads greatly improve safety and eliminate the cost and labor of burying, rerouting, or stringing cables overhead. Closure strips sold separately.

- Protects cables & hoses in mining and construction
- Made from durable urethane that withstands hundreds of thousands of pounds gross vehicle weight
- Impact and abrasion resistant to trucks and falling rock
- Eliminates cost of trenching or rerouting cables
- Protects cables and hoses up to 4.5 in outside diameter
- Available in 2 color options (specify color after model number)

O (orange)
  B (black)

400-ton haul truck drives over an Extreme Crossover Pad

**WARNING:** Crossover pads are for rubber-tired vehicles only and are not for equipment with metal tracks.

**NOTE:** Please make your product selection carefully.  
**Extreme Crossover Systems are non-returnable.**
